Notes

Date/Time: 2/14/2008 6:15:48 AM

Name of Specialist: Paul Pettit

History: Caller using restroom at worksite 2 days ago (Tues (2/12/08). Can of product on sink. Feels someone used excess AI sprayed into air. Thinks someone else mistook product for an air freshener. Inhaled fumes of AI while washing hands. Fumes of AI were thick in the air at that time.

Wens (2/13/8) at ~4:30 PM developed Resp irritation (can feel both lungs), thru last night-excess sinus mucus, throat irritation. Caller with shortness of breath, breaks in speech frequently per caller. Caller feels SX NOT from a cold.

With history of CHF (serious heart attack 3 yrs ago), needs nighttime Oxygen. Reluctant to take time off of work (as she is Head Cashier-indispensible to work flow).

A: With history of heart disease, need for oxygen, etc., and with SX of SOB etc., To MD NOW, prior to starting work at 10:30 AM today. To MD Now this AM.

Would not expect inhaling fumes to cause Delayed SX. Would expect SX at time excess inhaled, if any SX were to develop, not ~24 hrs later.

Name of Specialist: Tim Smith

History: PROSAR CB attempt #2

Speaking with [REDACTED]

The patient was evaluated in a local ED on 02/15/2008. The treating physician told her that "nothing was wrong." The physician felt her s/sx were related to "something else." The difficulty breathing and other respiratory symptoms have not yet resolved. The caller called in ill to work today.

Ax:

- Recommend continuing to f/u with your physician if the s/sx are not improving.

Set one additional f/u call
